

AEYE DEFEND

An unprecedented AI and machine learning solution that turns video surveillance cameras into a fully autonomous Weapons Detection Platform (WDP).

Stay ahead of evolving threats with cutting-edge **artificial intelligence**

- Highest Rates of Detection
- Lowest False Positives
- Autonomous Detection
- Agnostic Hardware Integrations
- No Data Mining or Privacy Invasion
- Mass Scale Implementation

Rapid Detection

Immediate notifications with precise location and weapon identification sent to authorized contacts and law enforcement.

Ultimate Data Privacy

All data is self-contained. Analysis can be done on-site and is securely stored with 256-bit encrypted storage.

Easy Implementation

FTSI's team has over 25 years of financial industry experience. We utilize your existing camera system with this turnkey platform.

DETECT

Achieves an exceptional 95.6% accuracy rate of detection, setting the industry standard.

LOCATE

Locates triggered CCTV camera's geo-location of the perpetrator and threat in real-time.

ALERT

Instantaneous notification of potential threats, enabling rapid response and mitigation

Data Privacy

AEYE DEFEND adheres to stringent data protection and privacy regulations, including FERPA, HIPAA, FDIC, and CCPA. 21st Century AEYE's Weapons Detection Software (WDS) sits directly on the server and camera network of the customer- meaning data is not analyzed, collected, stored or otherwise processed by 21st AEYE or any other 3rd parties. All data generated belongs to and stays with the end-user protected by AES-256byte (military grade) encryption. 21st Century AEYE DEFEND is the only WDS that can offer full data-sovereignty which protects privacy while eliminating risk of generative data mining.

What our customers are saying

“ Texas has experienced too many tragedies which have cost us children's and teachers' lives. My district has experienced this first-hand with the Santa Fe school shooting. Texas is taking action now to keep our children safe. ”

JULIE PICKREN - TEXAS STATE BOARD OF EDUCATION

“ With this new AI technology, we believe Golden Rule will become a beacon that other districts and charters will soon follow. The protection of children's lives is paramount, and the partnership understands the importance of taking action to help prevent the next tragedy from occurring. ”

SUPERINTENDENT DR. VICENTE DELGADO
GOLDEN RULE CHARTER SCHOOL, DALLAS, TX
